

Towel Rack Project

Background

Lake Sallateeska has been a resource for Illinois Baptist Churches since 1942 for summer camps and retreats. Over the many years it has been open, the camp has seen children and adults come to Christ and deepen their relationship with Him. Through faithful service of volunteers and staff, the camp has been able to provide a place where people feel comfortable, safe and relaxed and a place where people can connect with the Lord and each other. In order to provide this, there is constantly work that needs to be done to maintain and improve the camp grounds to keep the property looking beautiful.

Project

This project would consist of creating drop down towel racks to be mounted to the outside of the cabins to provide a drying place for wet towels and clothes.

Logistics

This project would be great for a group of 2-5 adults with basic construction knowledge or a willingness to learn. The camp manager can teach basic skills needed to put these boxes together. The project would take one day to complete. It would need to be completed by May 31st but can but can be worked on anytime between March and May. All materials for this project will be provided by the camp, including wood, table saws, nails and plastic lining. We would suggest that participants bring their own impacts, hammers, or battery hand saw if they have them.

Snacks and drinks will be provided by the camp, but all meals will be the responsibility of the group. The camp can provide meals for \$7/meal/person if advance notice is given. There is also a kitchen available for groups that want to cook their own meals. Every project participant will

receive a “Lake Sallateeksa Camp Volunteer” t-shirt and our gratitude for serving alongside us in ministry.

Contact: If you have questions about adopting this project please contact Brock Vandever (Camp Manager) at BrockVandever@ibsa.org or 618-318-9424.
